

Advanced Lookup

Microsoft Excel FORMULAS & FUNCTIONS

Prepared by: Sabbir Hossain

Dataset Overview

This assignment focused on applying advanced Excel lookup techniques to solve real-world business reporting problems. Instead of using static formulas, interactive dashboards and dynamic reports were created using modern Excel functions.

The project demonstrates how lookup functions can automate pricing, discount calculation, country analysis, and movie rating reports while reducing manual work.

Price Checker Dashboard Index & Match

	XSmall	Small	Medium	Large	XLarge
Socks	\$4.00	\$4.25	\$4.50	\$4.75	\$5.00
Shorts	\$12.00	\$12.50	\$13.00	\$13.50	\$14.00
Pants	\$24.00	\$25.00	\$26.00	\$27.00	\$28.00
T-Shirt	\$15.00	\$15.50	\$16.00	\$16.50	\$17.00
Sweater	\$30.00	\$31.00	\$32.00	\$33.00	\$34.00

<i>Product:</i>	<i>Size:</i>		Price
Pants	Medium	=	\$26.00

This approach simulates a retail pricing system where users can instantly retrieve product prices without searching manually.

Order Discount Calculator

Order ID	Order Amount	Discount %		Order Amount	Minimum	Discount
44016	\$82.68	10%		\$0 - \$24.99	\$0	0%
24854	\$4.95	0%		\$25 - \$49.99	\$25	5%
37210	\$93.98	10%		\$50 - \$99.99	\$50	10%
14622	\$27.88	5%		\$100+	\$100	20%

Automatically determine the correct discount percentage based on order amount.

IMDB Ratings Dashboard

	IMDB RATINGS			3		
Genre	2016	2017	2018	Year Average		
Action	6.56	6.45	6.41	6.48	Select Year:	2017
Adventure	6.60	6.81	6.86	6.76	Select Calculation:	AVG
Animation	7.00	7.20	7.00	7.07		
Biography	7.49	6.86	7.22	7.19	AVG RATING:	6.42
Comedy	6.21	6.13	6.32	6.22		
Crime	6.75	6.86	6.78	6.80		
Documentary	5.75	6.95	7.10	6.60		
Drama	6.66	6.54	6.55	6.58		
Fantasy	6.27	4.70	6.10	5.69		
Horror	6.08	5.72	5.35	5.72		

Build a dynamic movie rating dashboard where users can analyze ratings by selected year and calculation type.
