

INTRODUCING MICROSOFT EXCEL

In this section we'll **introduce Microsoft Excel**, create and save our first workbook, navigate the Excel interface, and align on important language preferences for the course

TOPICS WE'LL COVER:

Meet Microsoft Excel

Creating Workbooks

Excel Interface

Language Preferences

GOALS FOR THIS SECTION:

- Review the current Excel landscape
- Launch Excel and create your first workbook
- Navigate and explore the core components of the Excel interface
- Set "English" as the display language

MEET MICROSOFT EXCEL

Microsoft Excel is a powerful spreadsheet tool which includes desktop, web-based, and mobile applications for managing, analyzing, and visualizing data

Common use cases include:

- Data analysis
- Business dashboards
- Financial modeling
- Project management
- Statistical inference
- and more!

EXCEL LANDSCAPE

The current **Excel landscape** consists of three main versions:

Excel Online

- Works on web
- Free
- Limited functionality

Excel 365

- Works on desktop
- Subscription payments
- Latest updates

Excel 2024

- Works on desktop
- One-time fee
- No updates

PRO TIP: Microsoft offers a 30-day free trial to a **Microsoft 365 Family** subscription that you can use to follow along with the course (*you can then cancel or switch to Personal*)

CREATING WORKBOOKS

There are two main ways to **create a new Excel workbook**:

1) Open Excel and click **Blank workbook**

(You can also go to File > Blank workbook)

2) With a workbook open, click **CTRL + N** to open a new one

PRO TIP: SAVING WORKBOOKS

Workbooks are **saved to OneDrive** by default, but you can modify this in the settings:

LANGUAGE PREFERENCES

The **Office display language** affects the buttons, menus, and functions

- Additional display languages can be installed through the "Add a Language" option

HEY THIS IS IMPORTANT!

Make sure you set the display language to "English" so you can follow along with the demos seamlessly
