

FILTERING

You can **filter** data in a table to only show the records that match a specific criteria

- To enable filters, you need to go to Home > Sort & Filter > Filter (**CTRL+SHIFT+L**)

The screenshot displays the 'Filter' dropdown menu on the left, which includes options for sorting and filtering. The 'Text Filters' section is highlighted, showing options like 'Equals...', 'Does Not Equal...', 'Begins With...', 'Ends With...', 'Contains...', 'Does Not Contain...', and 'Custom Filter...'. The 'Custom Filter...' option is selected, leading to the 'Custom Autofilter' dialog box. In this dialog, the criteria 'Total Bill' is set to 'is greater than' 75, with 'And' selected for the logical operator. The 'OK' button is highlighted.

Below the dialog, a table of restaurant orders is shown, filtered to display only records where the total bill is greater than 75. The table has columns: Check #, Date, Day, Time, Server, Party Size, Total Bill, Tip %, and Cash. The filtered records are highlighted in green.

Check #	Date	Day	Time	Server	Party Size	Total Bill	Tip %	Cash
58	2025-01-04	Sat	Dinner	Mac	4	\$81.15	15%	
143	2025-01-11	Sat	Lunch	Dennis	6	\$98.61	18%	
158	2025-01-11	Sat	Dinner	Mac	6	\$77.31	20%	
187	2025-01-12	Sun	Dinner	Charlie	5	\$86.89	15%	
206	2025-01-16	Thu	Lunch	Charlie	4	\$76.37	18%	
218	2025-01-17	Fri	Lunch	Dee	5	\$80.30	20%

SORTING

You can **sort** data in a column in ascending (A to Z) or descending (Z to A) order

- This works on numbers, dates, and text

The screenshot displays the 'Sort' dropdown menu on the left, which includes options for sorting and filtering. The 'Sort Largest to Smallest' option is highlighted. Below the menu, a table of restaurant orders is shown, sorted by 'Total Bill' in descending order. The table has columns: Check #, Date, Server, Party Size, Total Bill, Tip %, and Cash. The sorted records are highlighted in green.

Check #	Date	Server	Party Size	Total Bill	Tip %	Cash
2	2025-01-19	Charlie	1	\$15.00	15%	
3	2025-01-19	Mac	3	\$34.89	20%
